## Save the World, *-and save money!*

**We believe 'Naked Hydroponics' is the first -and only- commercially available hydroponic system which is specifically designed for home gardeners, and cheap enough to actually save you money.**

Instead of buying a full head of lettuce or a bunch of celery and throwing half away, with a naked planter you can just walk out onto your veranda and pick a leaf or a stick whenever you want.

That's what we call 'fresh'.

With no pumps, growing medium, lights or energy input whatsoever -except sunlight!- your naked planter will last for years, **making your initial purchase very cheap indeed.**

**Are you a little concerned about the way things are going? Worried about dwindling resources, 'Peak Oil', soaring fuel -and food- costs, chemical sprays, weird additives...**

*“Global food prices hit a record high in December and are likely to continue rising in the year ahead due to inclement weather.”*

*“The average Australian basket of food has travelled over 70,000 kilometres from producer to consumer, suggests the first study of its kind.”*

*“...in Australia it's estimated we waste more than \$5.3bn worth of food annually.”*

With our central markets, chances are *even if you live in a vegetable growing district*, the veggies you buy will travel to your capital city, before travelling back again to your retail outlet.

When you grow your own, you can harvest a single lettuce or celery plant for weeks, and the only travelling it will do is from your veranda to your plate.

And \$35.00 worth of nutrients could have you swimming in lettuce alone, for around 4 years! (for 1 planter).

- No lifting, bending, weeding, shovels, wheelbarrows...
- no chemical sprays, out of the way of slugs, snails, dogs, cats, hares, chooks, bandicoots, kids...
- uses no useful space; just clamp onto your veranda railing or hang from a wall or fence
- ideal for people with bad backs or bad knees, people who rent, people who live in 2, 3 or 50 story houses or apartments, or people who just enjoy fresh veggies and herbs

**All our kits come with a 60 day satisfaction guarantee and a sample pack of nutrients, (enough to grow lettuce for 6 months!) so unless you mount your planter in a dark room, you'll be harvesting lettuce long before the guarantee runs out!**

**What have you got to lose?**

**Check out nakedhydroponics.com for more information.**

*A 'Fancy' Naked Planter, with an eclectic selection of Veggies, herbs and flowers.*

*Lettuce, Basil, Strawberry, tomato, dianthus, marigold, lettuce, tomato...*

Now you can *save yourself some cash* and do a bit to save our environment, at the same time.

*Dress up a bare sunny wall with Naked Planters.*

*Feed 2 for the price of one.*

*Put heavy feeders (tomatoes, etc) in the top planter, light feeders (lettuce etc) in the bottom planter, drain top planter into bottom planter, replace nutrient in top planter.*

*Look for us at weekend markets around the Wide Bay/ Bundaberg area. For specific times and places, ring Shirl on (07) 4126 1258 or Email [pete@nakedhydroponics.com](mailto:pete@nakedhydroponics.com)*

*Your Veranda Veggie Patch.*
